Near Term Silver-Gold Production

GUANAJUATO, MEXICO

DISCLAIMER

This management presentation (the “presentation”) is prepared as a summary overview only of the current affairs of Guanajuato Silver Company Ltd. (the “company” of “GSilver”) and was not prepared for the purpose of assisting prospective investors in making a decision to invest in GSilver. GSilver does not make any representation or warranty as to the completeness, truth, or accuracy of the information contained in this presentation including the accuracy, likelihood of achievement or reasonableness of any forecasts, prospects, results or statements in relation to future matters contained in this presentation. The views and information provided herein are based on a number of estimates and assumptions that are subject to significant exploration, business, economic, regulatory and competitive uncertainties. See “Forward-looking information” below. The company expressly warns readers not to rely on the information herein for investment or other related purposes. Accordingly, any use of this information is at your risk and without liability to the company. The information contained herein is not and does not constitute an offer to sell or the solicitation of an offer to buy any security in the United States or any other jurisdiction in which such offer or solicitation would be unlawful. GSilver’s securities are not and will not be registered under the United States Securities Act of 1933, as amended (the “1933 Act”), or any state securities laws and may not be offered or sold within the United States or to or for the account or benefit of a U.S. person (as defined in Regulation S) unless registered under the 1933 Act and applicable state securities laws or an exemption from such registration is available. The reader is referred to his/her professional investment advisor regarding investment related decisions respecting the securities of the company.

Confidentiality

This Presentation is confidential, and the contents are not to be reproduced or distributed to the public or the press. Applicable securities legislation prohibits such unauthorized distribution of information. Each recipient of the information contained in this presentation will treat such information in a confidential manner and will not, directly or indirectly, disclose or permit its affiliates or representatives to disclose such information to any other person or reproduce this presentation in whole or in part, without the prior written consent of GSilver .

Forward-looking information

This presentation contains certain forward-looking statements and information, which relate to future events or future performance including, but not limited to, the company’s successful acquisition of El Cubo on the proposed terms and estimated timing for closing thereof, the ability of GSilver to raise the necessary funding to purchase El Cubo on the terms and conditions contemplated, the ability of GSilver to successfully re-start the El Cubo mill, supply sufficient mineralized material from the company’s El Pinguico project and El Cubo for processing through the El Cubo mill at the projected rate, the ability to generate cash flow from the El Cubo mill as contemplated or at all, the exploration and development potential of El Cubo and El Pinguico and the potential existence of mineral resources thereon, and the potential intersection at depth of the “Veta Madre” with the company’s El Pinguico vein. Such forward-looking information and statements reflect management’s current beliefs and are based on assumptions made by and information currently available to the company. Readers are cautioned that such forward-looking information and statements are neither promises nor guarantees, and are subject to risks and uncertainties that may cause future results to differ materially from those expected including, but not limited to, market conditions, availability of financing, currency rate fluctuations, actual results of exploration and development activities, unanticipated geological formations and characteristics, environmental risks, future prices of gold, silver and other metals, operating risks, accidents, labor issues, delays in obtaining governmental or regulatory approvals and permits, and other risks in the mining industry. There are no assurances that GSilver will successfully finance and complete the acquisition of the El Cubo on the terms contemplated or at all or, if acquired, that the company will be able to successfully re-start the El Cubo mill to process mineralized materials in the amounts and at the costs anticipated. In addition, there is uncertainty about the spread of COVID-19 and the impact it will have on the company’s operations, supply chains, ability to access El Pinguico or El Cubo or procure equipment, contractors and other personnel on a timely basis or at all and economic activity in general. All the forward-looking statements made in this presentation are qualified by these cautionary statements and those in our continuous disclosure filings available on SEDAR at www.sedar.com. These forward-looking information and statements are made as of the date hereof and the company does not assume any obligation to update or revise them to reflect new events or circumstances save as required by law.

Quality assurance / quality control

All scientific and technical information in this presentation has been approved by Hernan Dorado, a director of GSilver and a “qualified person” as defined in National Instrument 43-101 of the Canadian Securities Administrators.

THE EL CUBO MILL AND MINE COMPLEX

*Recently acquired from
Endeavour Silver Corp. for
US\$15M*

PEA SHOWS QUALITY RESOURCE

- Study shows 7-year mine life
- Combined Project total ounces:
 - Indicated resources of 7.2m AgEq oz
 - Inferred resources of 20.3m AgEq oz

DEDICATED MANAGEMENT TEAM

- A diversity of experience, backgrounds and talents is our strength.
- BOD and management are significant shareholders and aligned with shareholder interests.

THREE MONTHS TO PRODUCTION

- Refurbishing of mill to additional 60 to 90 days.
- Projected operating costs of \$9.42 per AgEq/ounce from PEA.
- Material to be sourced from both El Pingüico and El Cubo projects.

GUANAJUATO, MEXICO

- 480-year-old mining jurisdiction.
- Good relations with local communities.
- Experienced local labour force.
- +7,000 ha. of prospective mining claims.

El Cubo Resource Expansion

GSilver is now the dominant claim holder in the Guanajuato mining district - with over 7,000 ha of prospective mining claims

EL PINGÜICO

Highest grade mine in the region from 1890 till 1913.

This 400 tpd mine was owned by NYSE listed “Pingüico Mines Co.” of New York City until 1913 when operations ceased due to the Mexican Revolution; it is located just 8km from El Cubo.

“

Rich shoots are seldom found in nature to recur so often in any mine as they are found here.

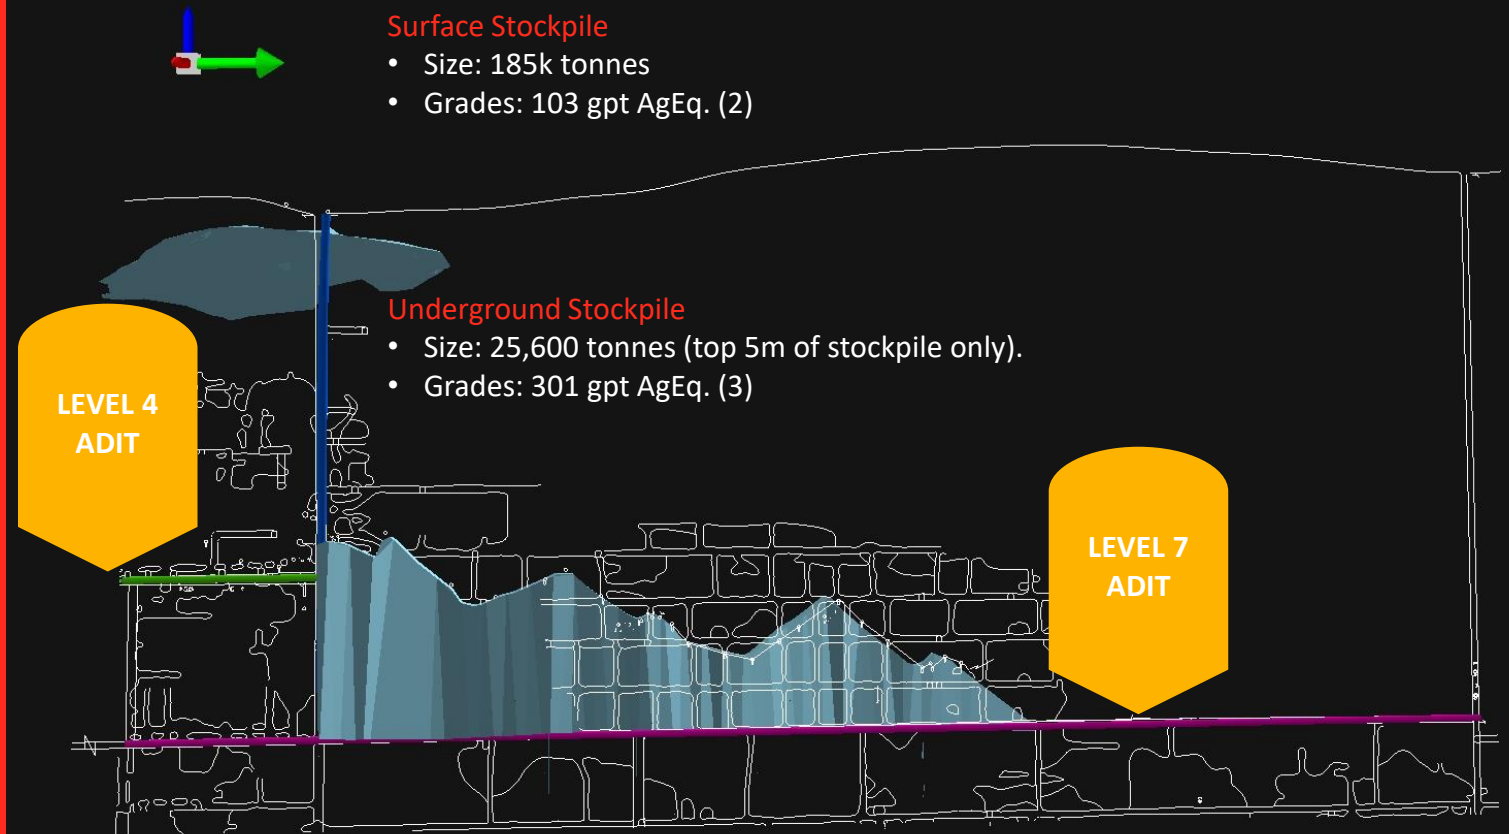

PROFESSOR ROBERT T. HILL
C.1906

**EL PINGÜICO SURFACE AND UNDERGROUND STOCKPILES –
“FEED FOR A HUNGRY MILL”**

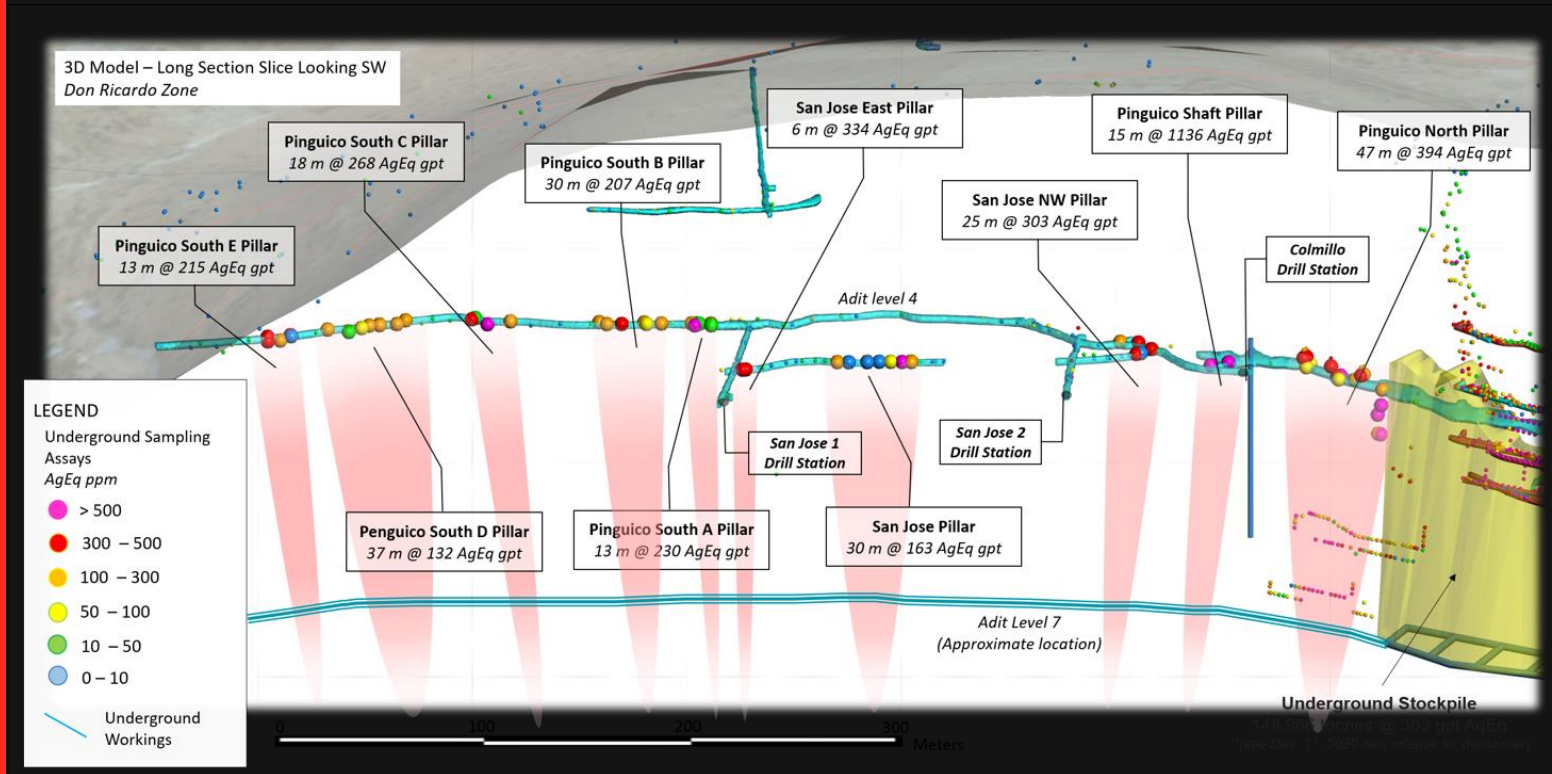

Stockpiles Can Deliver 40% of Mill Feed for First 36 Months

- Surface material ready for delivery.
- Underground material can be removed along Level Seven or through the El Pingüico shaft.

LONG SECTION SHOWING HIGH-GRADE AREAS OF EL PINGÜICO AND SAN JOSE VEINS

Channel Samples Near El Pingüico Shaft Reported 537 gpt AgEq Over 55m Vertical Extent.⁴

DRILLING THE VETA MADRE: A POTENTIAL GAME CHANGER

The Veta Madre is nearly parallel to and about 5,000 feet east of the Pingüico vein and it has a dip of forty to forty-five degrees toward Pingüico. The faulting in this district is known to have been very profound, and it is entirely probable that the Pingüico fault extends down to the mother-vein.

Dedicated and Experienced Board of Directors

JAMES ANDERSON CHAIRMAN & CEO

Over 20 years of capital market experience as a retail broker investment banker and manager in the Canadian brokerage business. James has been instrumental in the financing of several small-cap public companies in mining exploration and development. Served as CEO of NuLegacy Gold Corp from 2012-2019 before establishing Guanajuato Silver Company. James is a graduate of the University of Alberta.

RAMÓN DÁVILA DIRECTOR

Mr. Davila was Chief Operating Officer and member of the Board of Directors of First Majestic Silver Corp from 2004 to 2014. Within that 10-year period, he led a team that created five new silver mining operations in Mexico, taking the company from two employees to more than 4000, growing First Majestic's production profile from zero to over 12 million ounces of silver equivalent production per year. In September 2016, Mr. Davila was appointed Minister of Economic Development for the State of Durango, Mexico – a post he held until June 2020. He graduated from the University of Guanajuato with a degree in Mining and Metallurgical Engineering as well as a Master of Science degree in Mineral Economics from the Colorado School of Mines.

HERNAN DORADO DIRECTOR & COO

Director of Guanajuato Silver Company since 2017, Hernan is a Mining Engineer with more than 15 years of underground and open pit mining experience. He has in depth knowledge of the El Pingüico mine and vast experience with precious metal projects like Pan-American Silver's La Preciosa in Mexico, and New Gold's Peak Mines in Australia. Hernan is a graduate of Mining Engineering with an Executive MBA from Escuela Europea de Negocios, Salamanca, Spain.

Dedicated and Experienced Board of Directors

WILLIAM GEHLEN DIRECTOR

From 2013-2018, Mr Gehlen was Manager of Resource Development for OceanaGold Corp. Prior to Oceana, he served as VP of Exploration for Pacific Rim Mining Corp where he managed all aspects of mineral exploration for the company and oversaw the El Dorado gold deposit in El Salvador and the Diablillos gold-silver deposit in Argentina. Mr Gehlen serves as the Manager of Corporate Development for Gold Standards Venture Corp. and holds an M.S (Geology) from the University of Idaho.

DANIEL OLIVER DIRECTOR

Daniel manages Myrmikan Capital LLC of New York, which actively invests in the precious metals mining sector. He is the President of the Committee for Monetary Research & Education, made famous for opposing the Bretton Woods monetary system in 1970. A noted commentator with articles published in Forbes, The Wall Street Journal, The Washington Times and others. Daniel holds a J.D. from Columbia Law School and an MBA from INSEAD.

RICHARD SILAS DIRECTOR & VP CORP DEVELOPMENT

Mr. Silas has been a Director of Guanajuato Silver Co. since October of 2019; Richard now also serves as VP of Corporate Development. Previously was President of Barksdale Res. Corp., where he played a vital role in acquiring the company's Sunnyside project in Arizona. Sunnyside is located adjacent to South32's Taylor deposit, which was acquired in 2018 for \$2.1 Billion. Mr. Silas has 20+ years' experience in corporate governance, regulatory compliance, and administration of resource companies. Prior to Barksdale, Mr. Silas was a Director of Gold Standard Ventures Corp. (TSX and NYSE listed) from 2009 until 2017. During his time at Gold Standard, the Company's market capitalization increased from \$23 million to over \$400 million.

Operating Team in Place

HERNAN DORADO SMITH CHIEF OPERATING OFFICER

Mining Engineer

16 years experience operating in Canada, Australia, Mexico, Brazil, and Dominican Republic.

GERARDO DORADO CANTO EL PINGUICO MINE MANAGER

Mining Engineer

44 years experience operating throughout Mexico.

ROBERT SEDGEMORE DIRECTOR OF MILL COMMISSIONING

Process Engineer

25 years of international experience in the mining industry, including extensive experience in South America.

LISA DEA CHIEF FINANCIAL OFFICER

Chartered Professional Accountant

20 years experience in the finance, securities and accounting fields.

FELIZARDO ESCUDERO HUMAN RESOURCES MANAGER

Human Resources Manager

32 years experience in recruiting and labour relations in the mining industry including 2 years experience at El Cubo.

MONICA SELEME ENVIRONMENTAL SERVICES MANAGER

Environmental Systems Engineers

11 years experience consulting for environmental standards – 8 years experience with First Majestic Silver Corp.

ANTONIO NITO PACHECO HEAD OF SAFETY AND SECURITY

Mining Engineer

20 years experience in safety and security of Mexican open pit and underground mines - 5 years experience at El Cubo.

CARLOS ORTIZ MINE PLANNER

Mining Engineer

19 years experience in Guanajuato area mines - 6 years experience at El Cubo.

PEDRO DELGADO MINE MANAGER AT EL CUBO

Mining Engineer

33 years experience working in operations management in mining throughout Mexico.

Advisory Board

STUART “TOOKIE” ANGUS BUSINESS ADVISOR

- Independent business advisor to the mining industry.
- For the past 30 years, Mr. Angus has focused on structuring and financing significant international exploration, development and mining ventures.
- Managing director of mergers and acquisitions for Endeavour Financial, a director of Ventana Gold until its takeover by AUX Canada Acquisition in 2011, and a director of Plutonic Power until its merger with Magma Energy in 2011.
- Chairman of Nevsun Resources Ltd., until its takeover by Zijin Mining in March of 2019.

JOHN BUDRESKI BUSINESS ADVISOR

- Director and Executive Chairman of the Board for EnWave Corp.
- Formerly a Vice Chairman of Cormack Securities Inc. and prior to that, President and CEO of Orion Securities Inc.
- Over 25 years of experience in the resource and resource financing industries.
- Director of Sandstorm Gold Ltd., Imput Capital, and NuLegacy Gold Corporation.
- John holds a Bachelor of Engineering from Dalhousie / TUNS University and an MBA from the University of Calgary.

GREG HAWKINS GEOLOGICAL ADVISOR

- Has been involved in the mining industry since 1969.
- Had various responsibilities in the identification and delineation of 10 mineral deposits in Canada, USA, Chile, Ghana, Mali and Zaire.
- In 2004 Mr. Hawkins was awarded the Frank Woodside Past Presidents Awarded by the British Columbia and Yukon Chamber of Mines in recognition of his outstanding contribution to the mining industry.
- Mr. Hawkins holds a BSc in Geology from the University of Alberta and MSc in Mineral Economics from McGill University.

END NOTES

(1) The mineral resource estimate used as the basis for the January 29, 2021, Behre Dolbear & Company (USA), Inc., PEA was derived from Endeavour's previous technical report for El Cubo titled "National Instrument 43-101 Technical Report: Updated Mineral Resource and Reserve Estimate for the El Cubo Project, Guanajuato, Mexico" dated March 3, 2017, and amended March 27, 2018 (effective December 31, 2016) by Hardrock Consulting LLC. and computer models developed by Endeavour and Guanajuato Silver Company's (the "company" of "GSilver") previous technical report for El Pinguico titled "NI 43-101 Technical Report for El Pinguico Project, Guanajuato Mining District, Mexico", dated effective February 28, 2017, by Carlos Cham Dominguez, C.P.G., copies of which have been filed by Endeavour and GSilver, respectively, under their profiles on SEDAR. Behre has reviewed the information, estimation methods and the estimates in such reports and is of the opinion that the estimates are reasonable and can be utilized for the PEA, subject to certain adjustments including those summarized below.

(2) In 2012 a private company commissioned by the then owner of El Pinguico calculated the volume of the surface stockpile as 92,849.5 m³, with a surface of 15,769.40 m². In January 2017, Findore S.A. DE C.V. ("Findore"), a private geological services company engaged by GSilver, dug 10 holes with a backhoe CAT machine in the stockpile at different locations and different depths, taking two samples from each hole (one at the top and one at bottom). The samples confirmed there was no movement of economic values from surface to bottom of the stockpile due to weathering and rains, with the average samples results as follows:

	Au ppm	Ag ppm	AuEq ppm
Top samples	0.62	80.6	1.78
Bottom sample.	0.43	61.1	1.31

Based on the foregoing, GSilver estimates the surface stockpile comprises approximately 175,000 to 185,000 tonnes of material grading between 0.45 gpt Au and 67 gpt Ag (100 gpt AgEq) and 0.52 gpt Au and 70 gpt Ag (110 gpt AgEq). The potential quantity and grade of the surface stockpile is conceptual in nature, there has been insufficient exploration to define a mineral resource and it is uncertain if further exploration will result in the stockpile being delineated as a mineral resource.

(3) In 2012, "Servicio Geológico Mexicano" (SGM, the Mexican Geological Survey agency) took 56 samples from 19 trenches distributed over 300 meters of the underground stockpile to a depth of 1.5 meters with an average trench width of 6.95 meters. The grade of the top 5 meters of the stockpile was determined through trench sampling and tonnage was estimated by topographic survey and historic mine plans with no grades assigned to tonnes below 5 meters due to inaccessibility. None of the categories of classification assigned by SGM comply with those set out in NI 43-101 or CIM guidelines. Average grades are historic in nature, have not been verified and should not be relied upon. Additional work is required to verify the grade distribution throughout the whole stockpile before it can be applied to all the available tonnage and qualify for current classification standards. A "qualified person" as defined under NI 43-101 has not done sufficient work to classify this historical estimate as current mineral resources or reserves and GSilver is not treating the historical estimate as current mineral reserves or resources.

(4) Based on 57 samples taken by GSilver in 2017 from 20 trenches (mostly historic with a few new trenches) within the UG stockpile. All samples were collected, recorded, bagged and sent by GSilver's consulting geologist to ALS Laboratory in Guadalajara, Mexico for sample preparation. Gold, silver and multi-element ICP analysis was completed at the ALS laboratory in North Vancouver, Canada. Rock samples were fine crushed (70% passing a 2mm screen), pulverized (85% passing a 75 micron screen) and a pulp split separated for assaying by a riffle splitter. 30 gram portion of each sample was assayed for gold by standard fire assay and a 10 gram split was analyzed for 35 elements by ICP method. Standard reference material and blank samples were inserted into the sample stream at a 5% insertion rate with pulped samples from the underground stockpile for quality control purposes. The results of the standards and blank samples were satisfactory. All data was collected with industry standard practices and assay results were verified by 'GSilver's consulting geologist. The Company is in the process of conducting further metallurgical testing to verify this and Endeavour Silver Corp's published metallurgical results.
